HEMEROCALLIS

RICHARDS GARDENS

MRS. R. E. RICHARDS

423 East Franklin Street, Greencastle, Indiana

Hemerocallis are recognized as indispensable for the summer garden. By choosing both early and late varieties the season can be extended from spring until fall.

They grow in any kind of soil but appreciate plenty of nourishment and moisture, though they are very drought resistant. While they will grow in shade they need sun for part of the day to produce blooms and do even better in full sun. As they do not require frequent division space them from two to three feet apart to permit increase in size of clumps. Mix some well rotted manure in the holes for planting or compost with a handful of bone meal added.

Join THE HEMEROCALLIS SOCIETY for information. Send \$3.00 dues to the Secretary, George E. Lenington, Box 139, Kansas City 10, Missouri.

TERMS: CASH WITH ORDER. Orders amounting to \$4.00 postpaid. Below that add 35 cents for packing and postage. Prices are for strong single divisions guaranteed true to name. THREE PLANTS FOR THE PRICE OF TWO for any variety priced below \$1.00. No substitutions without permission.

COLLECTIONS

YOUR SELECTION—Any 8 priced at 75 cents each.
\$5.00

YOUR SELECTION—Any 6 priced at \$1.00 each.
\$5.00

DISCOUNT—On orders amounting to \$15.00 and over select an additional 10% value. Above collections not included.
